SUMMARY

Full-stack software engineer with 3 years of experience shipping accessible, production software end-to-end. Strong track record of turning ambiguous problems into delivered features with measurable business impact across user experience, data quality, and platform reliability.

SKILLS

Languages: JavaScript, TypeScript, Python, Kotlin, Ruby
Front-End: React, Angular, Next.js, HTML5, CSS3, Tailwind, Material UI
Back-End: Node.js, Postgres, SQL, REST APIs, GraphQL, SpringBoot, RabbitMQ
Testing/Deployment: Jest, Docker, Kubernetes, AWS, Azure, Nginx, CircleCI, Spinnaker, CI/CD
Developer Tools: Git, Claude Code, Codex CLI, Datadog, LogRocket, Redash, Vim, npm, Bun, Jira, Agile, Scrum

EXPERIENCE

Full Stack Software Engineer, AlphaSights — Jan 2024 - May 2026

- Designed and launched the company's first LLM-powered outreach workflow, doubling associate productivity and credit revenue
- Developed a responsive, accessible customer-facing product adopted by 30K+ users and generating $200K+ in revenue
- Built a structured data capture workflow that increased usable data volume by 1.8x for downstream products
- Implemented AWS Cognito authentication with magic link, Google, and LinkedIn login, simplifying onboarding and supporting a 30% 60-day return rate
- Migrated a Ruby monolith into domain-aligned Kotlin microservices, contributing to 2x faster deployments
- Authored technical design documents for 10+ shipped initiatives, defining implementation plans and aligning stakeholders
- Resolved production page crashes by optimizing a 150+ field query and separating data retrieval across targeted endpoints
- Led API and analytics design across 8 repositories, standardizing service contracts and product instrumentation

eICU Data Assistant, Inova Health System — Aug 2022 - Jun 2023

- Organized 50+ patient transfer requests per shift for intensivists and nurses, supporting informed decisions during overnight shifts
- Produced daily critical care capacity reports across 200+ beds for senior leadership to support hospital staffing and capacity decisions

Support Technician, VHC Health — May 2020 - April 2023

- Assisted in 75 open heart surgeries as a second scrub, constantly communicating and adapting to changing needs in a high-stakes environment
- Coordinated with 20+ vendors and neighboring hospitals during COVID-19 to source backordered surgical supplies and maintain critical inventory

PROJECTS

opentowork: A job-search app built with Claude Code on FastAPI, Postgres and Next.js, with LLM resume tailoring
daily-diff: A local-first AI news digest that ranks and summarizes 45+ feeds with an LLM pipeline
inkloom.vercel.app/: An AI template studio with Supabase auth, storage, and gallery features
florascaper.vercel.app/: An AI garden planner that generates layouts from user constraints

EDUCATION

Advanced Software Engineering Certificate, Hack Reactor — Jun 2023 - Sep 2023
B.S. Biochemistry & B.A. Russian Language, Virginia Tech — 2016 - 2020
