SUMMARY

Full-stack software engineer with 3+ years shipping LLM product features and production systems end to end. Delivered 30+ initiatives at AlphaSights, including the company's first LLM outreach workflow, which doubled associate productivity and revenue. Builds AI side projects to explore emerging tools, from summarization pipelines to live full-stack apps.

SKILLS

Languages: JavaScript, TypeScript, Python, Kotlin, Ruby
Front-End: React, Angular, Next.js, HTML5, CSS3, Tailwind, Material UI
Back-End: Node.js, Postgres, SQL, REST APIs, GraphQL, SpringBoot, RabbitMQ
Testing/Deployment: TDD, Jest, Docker, Kubernetes, AWS, Azure, Nginx, CircleCI, Spinnaker, CI/CD, Code Review
Developer Tools: Git, Claude Code, Codex CLI, Datadog, LogRocket, Redash, Vim, npm, Bun, Jira, Agile, Scrum

EXPERIENCE

Full Stack Software Engineer, AlphaSights — Jan 2024 - May 2026

- Designed and launched the company's first LLM-powered outreach workflow, doubling associate productivity and credit revenue
- Shipped a responsive, accessible customer-facing product adopted by 40K+ users and generating $200K+ in revenue
- Built an automated structured data capture workflow, increasing usable data volume by 1.8x for downstream products
- Implemented AWS Cognito auth with magic link, Google, and LinkedIn login, streamlining onboarding and supporting a 30% user retention at 60 days
- Eliminated production crashes on a page used by 2K daily users by optimizing a 150+ field query and splitting data retrieval into targeted endpoints
- Migrated a Ruby monolith into domain-aligned Kotlin microservices, contributing to 2x faster deployments
- Authored technical design documents for 10+ shipped initiatives, defining implementation plans and aligning stakeholders
- Led API and analytics design across 8 repositories, standardizing service contracts and product instrumentation
- Integrated Claude Code across the SDLC, from design docs and refactors to test writing, PR review, and production debugging, catching bugs earlier and raising code quality

eICU Data Assistant, Inova Health System — Aug 2022 - Jun 2023

- Managed 50+ patient transfer requests per shift, organizing case details so intensivists and nurses could make timely decisions
- Produced daily critical care capacity reports covering 200+ beds, informing leadership's staffing and capacity decisions

Support Technician, VHC Health — May 2020 - April 2023

- Assisted in 75 open-heart surgeries as second scrub, anticipating surgical team needs and adapting in real time during high-stakes procedures
- Coordinated with 20+ vendors and neighboring hospitals during COVID-19 to source backordered surgical supplies and keep critical inventory stocked

PROJECTS

opentowork: A job-search app built with Claude Code on FastAPI, Postgres and Next.js, with LLM resume tailoring
daily-diff: A local-first AI news digest that ranks and summarizes 45+ feeds with an LLM pipeline
florascaper.vercel.app/: An AI garden planner that generates layouts from user constraints
inkloom.vercel.app/: An AI template studio with Supabase auth, storage, and gallery features

EDUCATION

Advanced Software Engineering Certificate, Hack Reactor — Jun 2023 - Sep 2023
B.S. Biochemistry & B.A. Russian Language, Virginia Tech — 2016 - 2020
